- This was my absolute favorite class. Professor Gutierrez loves music so much, and that passion makes his class excited to learn. I highly enjoyed learning from him. He made his class fun, and I learned so much. I look forward to taking his online Theory 2 class next semester.
- Professor Gutierrez is undoubtedly passionate about music theory, which creates an enjoyable classroom environment. He explains concepts thoroughly and encourages students to ask questions. Overall, his jovial spirit makes learning a difficult concept, like theory, fun.
- Great teacher, knew a lot about the history behind theory and overall knew a lot. Catered more to the music majors and minors than to the whole class. Took this class for "fun" was definitely harder than expected. But again great teacher and actually learned more than I thought I would.
- Loved this class. Mr. Gutierrez made me appreciate theory a lot more.
- I sincerely enjoyed your class. You pushed me beyond what I thought I was capable of. I am disappointed knowing that you won't be teaching in person anymore!
- Great class. Prof. Gutierrez, it helps that you push students to work hard and offer suggestions and resources for students who don't want to just take classes but actually learn. Your love for music and desire to live well and intelligently are motivating. Hands on experience with pianos in class would have been helpful. The more tips for practicing the better. Thanks for a great class.
